For portability

- ✓ *What if* a compact system could be so intuitive that it can be operated without a manual?
- ✓ *What if* a compact system could respond instantly between different modes?
- ✓ *What if* a compact system could operate for an entire work day with only one battery charge?
- ✓ *What if* a compact system could weigh as little as 5.4kg?
- ✓ *What if* a compact system could detect ultra-slow velocity < 2cm/s on tiny vessels , and also not miss the high velocity > 40m/s on cardiac?
- ✓ *What if* a compact system could image superficial tissues within 2mm and achieve more than 30cm of depth clearly on a 250 lbs difficult patient?
